

QUARTERLY REPORT
MARCH 31, 2013

Letter to Our Stockholders

Dear Stockholders:

2

Very pleasing growth in sales and good development of earnings: The NEXUS team was able to show an extremely positive track record in the first quarter 2013.

With sales increases of approx. 20% and improved revenues of approx. 18.1%, we were able to continue our development of increasing sales with a simultaneously high rate of increasing profits in the first quarter 2013.

This is a result, which is not to be taken for granted following the strong growth figures of the last periods. We are profiting from the good demand for our products and also from our newly acquired companies in this first quarter, which are responsible for part of the growth.

Our wide range of products in the meantime is also providing us with additional marketing potential. Today, we can provide our customers with a complete range of market-leading diagnostic information systems in addition to NEXUS / HIS. We also provide complete solutions for rehabilitation institutions and senior citizen homes. This is a tremendous advantage for our customers, because they no longer have to face technical integration aspects and delivery from one source substantially reduces complexity for them.

However, our focus in the first quarter was not so much on sales and marketing, but rather on the challenges that we face in implementing our large projects. We were able to make considerable progress in these projects in the first quarter. We advanced numerous new introductions and development tasks substantially, so that we can meet decisive deadlines this year. Against the background of many new orders, we are extremely satisfied with this situation.

Highlights Q1 - 2013 Company development

- + Strong increases in sales in the 1st quarter
- + Challenges of HIS project implementation
- + Great number of incoming orders in France
- + Very good development of business in the senior citizen home area

We also started with integration of CoM.Med GmbH in the first quarter, which we acquired on 1 January 2013. With 11 employees, the company develops and markets solutions for administration and billing for rehabilitation clinics in Germany and Austria. Now we can also provide complete solutions for rehabilitation institutions from the NEXUS portfolio, a gap that we have wanted to fill for quite some time.

The first quarter started very well with respect to the number of new orders. We received orders from a total of 86 hospitals, rehabilitation institutions and senior citizen homes. They included a call for bids for a complete hospital system, which we were able to win with NEXUS / HIS. The number of incoming orders greatly increased in France. Seven hospitals decided in favor of our OP documentation or CSSD software. In the area of senior citizen homes, we recorded orders from 33 institutions, especially for software conversions in Switzerland and Germany. Our product E-Qalin started the year very successfully in Austria. Within our diagnostic product groups, we were able to win institutions of the amedes Group for our pathology system and other customers in obstetrics (among others, Aachen University Hospital).

NEXUS is positioned more widely and stably today than in the past. Our incoming orders are smoothing out and coming from different business areas. Consequently, we are able to react very dynamically to different customer groups and the developments in various markets. The increased complexity is also creating very varied challenges, which we have to face in the upcoming months. We have to increase the professionalism of support for our regular customers even further and gain new employees for this area at the same time.

We are looking forward to these challenges and would like to thank you, dear stockholders, for your trust.

Warm regards

Dr. Ingo Behrendt
CEO NEXUS AG

Interim Annual Report-Sales

Report about the Profit, Financial and Asset Situation

NEXUS-Group sales increased in the first three months of the year 2013 from KEUR 13,855 to KEUR 16,604 (+20%).

We were able to achieve especially strong growth in the Healthcare Service area. The business area developed positively, and the sales of the acquired ASS.TEC GmbH, Villingen, were consolidated. Sales increased from KEUR 1,002 to KEUR 2,095. The Healthcare Software segment increased by approx. 12.9% to KEUR 14,509 (Q1-2012: KEUR 12,853); E&L medical systems GmbH, Villingen, was consolidated here for the first time. Without the sales of the companies consolidated for the first time, sales would have increased by 7.1% in the first quarter.

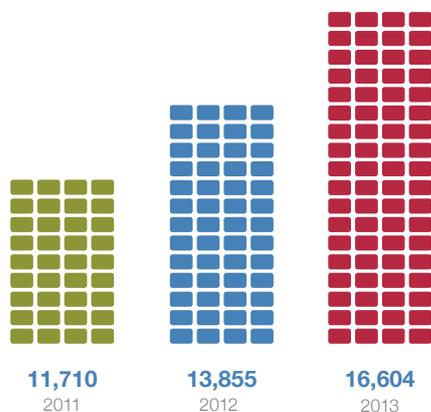

The international share of total business volume was 42.9% (previous year: 50.2%).

4

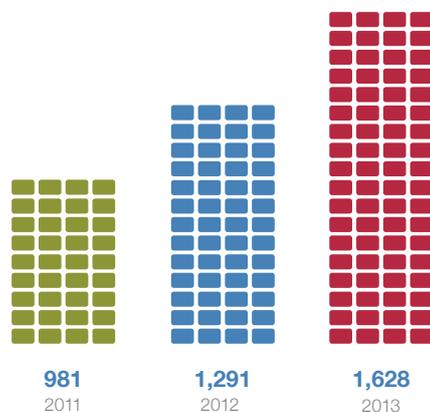

In addition to Switzerland, the highest volumes were in France and Austria. We were able to increase sales in Germany by 37.3% to KEUR 9,479 (Q1-2012: KEUR 6,903). The different growth rates in the regions are especially due to billing procedures, but also to the consolidation of the new subsidiaries in the first quarter. Exchange rate fluctuations compared to 2012 were not significant, because the average exchange rate of the Swiss franc as of 31 March 2013 SFR (1.21) only differs slightly from the average rate on 31 December 2012 (SFR 1.21).

We continued the uninterrupted positive development of sales of the NEXUS-Group of many years in the first quarter 2013!

Group (1st Quarter) sales in KEUR
+19.8% as of previous year

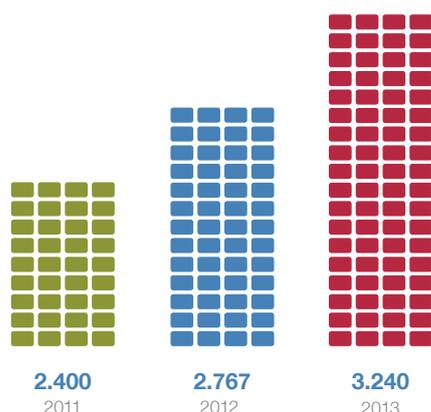

EBIT-development (1st Quarter) in KEUR
+18.1% as of previous year

The operating result after taxes improved by approx. 20.5% to KEUR 1,702. Earnings per share amounted to € 0.12 (Q1-2012: € 0.10).

The operating result increased by approx. 26.1% and achieved KEUR 1,628 in the first quarter compared to KEUR 1,291 in the previous year. The result before taxes and interest (EBIT) amounted to KEUR 1,662 following KEUR 1,407 (Q1-2012) and increased by approx. 18.1% compared to the previous year. Depreciation of intangible assets, which increased by approx. 9% to KEUR 1,612 (Q1-2012: KEUR 1,476) due the recent acquisitions, affected the result negatively.

EBITDA (1st Quarter) in KEUR
+17.1% as of previous year

The EBITDA increased correspondingly to KEUR 3,240 following KEUR 2,767 (+17.1%). One-time effects and expenses for company integrations are represented in their complete amount in the operating result.

Our operative cash flow remained strong at KEUR 4,547 in Q1-2013, but did not reach the high value of the previous year of KEUR 6,353. Special effects played a greater role in this last year.

Investments in the amount of KEUR 1.299 were made (Q1-2012: KEUR 978).

Liquid funds including securities increased by KEUR 2,941 to KEUR 25,992 in the first quarter (31 Dec. 2012: KEUR 23,051).

5

The balance sheet total increased from KEUR 101,167 to KEUR 105,124 compared to 31 December 2012. There are no essential bank liabilities. Intangible assets and goodwill add up to a total of KEUR 49,241 following KEUR 49,495 (31 Dec. 2012). Receivables from customers decreased from KEUR 19,122 to KEUR 18,790 compared to 31 December 2012.

Sales by division

Highlights 1st Quarter - 2013
Group Sales and Operating Result

- + 19.8% sales increase in first quarter 2013 from KEUR 13,855 (Q1-2012) to KEUR 16,604
- + 18.1% increase in result before taxes from KEUR 1,407 (Q1-2012) to KEUR 1,662
- + Strongly positive operative cash flow KEUR 4,547
- + EBITDA increased to KEUR 3,240 (+17.1%)
- + Increase of liquid funds by € 2.9 million to € 25.9 million

Employees

NEXUS-Group employed a total of 578 people as of 31 March 2013 (Q1-2012: 486 employees). The great majority of the employees (517) work in the Healthcare Software segment. The Health Care Service segment employs 61 people (Q1-2011: 35).

Innovation: NEXUS-Solutions

NEXUS / RIS: A Great Leap Forward in Efficiency in Radiology

The new Radiology Information System NEXUS / RIS is based on modern software architecture, which enables fast workflows and short paths. The experience from hundreds of installations has been integrated into state-of-the-art technology with one objective: To save time!

It is the newest generation of software, which NEXUS has to offer. With the new NEXUS / RIS, we have made great progress in ergonomics and function strength, a fact that radiologists and MTAs have confirmed. It's about time from the viewpoint of users. The market had not produced any completely new, technologically strong RIS for more than a decade. The customers are correspondingly enthusiastic when they test the new possibilities intensively.

The pre-configured diagnosis of examinations is especially striking. This provides radiologists and doctors with valuable support in structuring their workflows and saves time. NEXUS supplies a novel interface completely adapted to users for this: the NEXUS Workspace. In addition, plugins ensure a modular system.

NEXUS / HIS: Simple - Focused - Fast

NEXUS / HIS is designed on principle to be simple and user-friendly and is based on state-of-the-art technology. Hospital staff access required information with one click thanks to our „One-Click to Information“ philosophy. The new generation of hospital information systems enables even faster access to patient data; thanks to the use of mobile solutions, hospital staff have all relevant information on hand at all times. User-defined apps for medicine and care simplify everyday hospital work and are redundant throughout the system.

NEXUS / PDMS: Equipment integration in intensive care medicine

A patient management system cannot be a standalone system anymore today, but instead has to be integrated into a HIS with respect to functionality and ergonomics. This is the reason why NEXUS / PDMS was developed as an integral component of NEXUS / HIS – including equipment links.

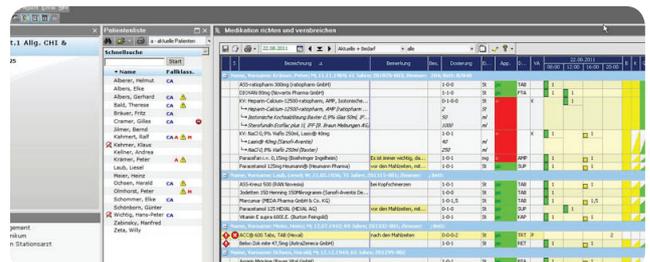

NEXUS / PDMS is not just an information system in this context, but also a communication system. The processes of intensive care medicine are depicted comprehensively. As a result, drug prescriptions, care process planning, entry of services performed, billing and display of the patient chart are performed using the standard module of the NEXUS / HIS solution. The advantage: doctors and nurses can find what they want more easily, because the same applications are used on wards and in intensive care. Access to the patient chart is retained when a patient is moved from intensive care. NEXUS has broken down the wall between intensive care solutions and HIS with this innovative approach.

Established Software Solution Supports CSSD: Modern - Comprehensive - Field-Proven

The user-friendly software NEXUS / SPM supports the cost-intensive supply of sterilized goods by the CSSD, which is critical for hygiene. Transparency and efficiency in the Central Sterile Supply Department (CSSD) are extremely important both with respect to finances and quality.

The NEXUS solution for the sterilization process supports and guides the staff via touch control in mastering their tasks. A detailed, prescribed procedure in NEXUS / SPM completely controls the cleaning workflow in the CSSD and comprehensively documents preparation of instruments with respect to quality – with relation to specific patients if desired.

The instruments used are sent in the allocated sieves from the OP area to the central supply department for sterilized materials with barcodes, data matrix, QR codes or RFID transponder. The software „receives“ the sieves for primary washing and records the workflow with respect to specific instruments.

NEXUS Company Information and Outlook

Chances and Risks

Please refer to the explanations in the annual report of 31 December 2012 for information about the essential chances and risks in the development of NEXUS-Group. There have been no essential changes in the meantime.

Outlook: Positive pulses

We were able to finish the first quarter 2013 very successfully continuing our unabated positive development of the last years. Sales increases of 19.8% and an increase of the Group result of 18.1% and a strong operative cash flow are pleasing results. Although we already had outstanding increase rates in the previous years, we are still able to improve our figures continually.

The penetration of new markets and business areas is significant, something that we have been pushing consistently for the past two years with product developments and company acquisitions. This is creating great potential, but also challenges to which we have to dedicate ourselves with tremendous intensity. We will have to prove during the next periods that we can continue to improve and expand our revenue picture in spite of these considerable investments.

We already see a lot of positive results in our new business areas and are very optimistic concerning the rest of 2013 thanks to our strong product portfolio and our good order situation.

Directors Holdings

The director's holders of the Supervisory Board and the Executive Board are as follows on 31 March 2013 in comparison to the previous year:

ACCOUNTING AND VALUATION METHODS

This interim report from the NEXUS-Group of 31 March 2013 has been prepared in keeping with the International Financial Reporting Standards (IFRS) as they are applied in the EU. The interpretation of the International Financial Reporting Interpretation Committee (IFRIC) has been taken into account.

The regulations of IAS 34 have been observed in the interim report of 31 March 2013. This refers to a summarized report, which does not contain all information of an IFRS Group Financial Statement, and consequently this report should be read in connection with the Appendix of the Group Financial Statement 2012. The same accounting and valuation methods were used in the Group Financial Statement for the business year 2012.

The report has not been audited.

NEXUS in the environment of the financial and health markets

Following a stock price leap from €9.10 to €9.69 on 28 December at the end of 2012, NEXUS shares started the year 2013 at an initially listed price of €9.49. The price declined in January to the September level of the prior year from €9.20 to €8.70. The price decreased to its lowest point of €8.69 in the time leading into February. NEXUS shares recovered in February to the second highest price until now and were listed at €9.34. NEXUS shares rose sharply for a short time at the time of publishing the annual report 2012 on 25 March. Publication of the invitation to the annual stockholders meeting at the beginning of April with the proposal to pay a dividend of €0.11 per share affected the price negatively (€8.63) after a direct rise (€9.12). Afterward, the stock price moved to a great extent within a range parallel to the TecDax in a sideways tendency around €9.00.
