BAADER

## COMPANY PROFILE

Baader Bank is one of the leading European partners for investment and banking services.

Trading and banking are combined using a single powerful platform that offers a unique setup and optimum access to the capital market using a secure, automated and scalable approach.

As a family-run, full-service bank headquartered in Unterschleißheim near Munich with around 550 employees, it is active in the areas of Market Making, Capital Markets, Brokerage, Fund Services, Account Services, and Research Services.

### Market Making

We are a full-service provider offering outstanding quoting and execution quality and optimum process efficiency. We utilise a range of stock exchanges and collaboration models.

We are quick to assess and implement the latest technology, process and service innovations and tap into potential new markets and products.

### Brokerage

We are a high-profile trading partner and count among the market leaders, particularly in relation to the cash equity business from Germany, Austria and Switzerland. Our product portfolio is completed by derivatives and interest rate products. We are the number one contact for international investors in German-speaking regions, and in particular for the German-speaking business, though also for pan-Europe and global.

### Capital Markets

As a capital market partner for corporate clients and issuers, we offer added value with our trading expertise. Our collaborative role in transactions is bolstered by our placement and structuring expertise. Our service offering for corporate clients is rounded off by excellent, award-winning corporate and sector research, investment technology and asset management from a market leader.

### Account Services

We are the pioneer behind the pioneers. We provide our modern infrastructure to numerous leading fintechs, making a fundamental contribution to their business model. With our regulatory-compliant and highly efficient banking platform, we guarantee the fulfilment of future banking requirements through our performance — from custody account management straight through to break down. We also offer our banking services to traditional asset managers and corporate clients, always B2B or B2B2C.

### Research Services

Together with our partner AlphaValue, we are the leading provider of independent pan-European equity and sector research. We provide quality research for selected companies and sectors within the GSA Region, plus an extensive range of pan-European corporate securities. With this approach, we create added value for corporate clients looking to generate capital and for investors seeking investment ideas.

### Fund Services

We provide a regulatory-compliant and highly efficient banking platform for asset managers, liability umbrellas, family offices, foundations and fintechs and, as an outsourcing partner of capital management companies, we realise fund mandates. We relieve the strain on resources and processes in asset management and portfolio management by taking on all regulatory and administrative tasks relating to a mandate.
