1. Investment case

HELMA

... **is a leading supplier** of individual detached houses as well as pre-planned semi-detached, terraced and multi-family houses as well as holiday properties in Germany.

... **invests on a large scale in land plots** in high-growth metropolitan regions and attractive holiday regions, and thereby **has a broadly diversified project pipeline** characterised by favourable entry conditions.

... **is benefiting greatly from the 5 real estate megatrends:** Environmentally compatible construction / Attractive metropolitan regions / Living in the countryside / Home office working / Vacations in Germany.

... is making an **active contribution to achieving Germany's climate protection targets.**

... aims to continue its profitable growth in the long term and expects **consolidated revenue of significantly above € 400 million** and **consolidated EBT of significantly above € 40 million** by **2024** at the latest.

2. Business model

Individual segment

- **Individual detached houses both with** (HELMA Wohnungsbau GmbH) **and without land plots** (HELMA Eigenheimbau AG).
- Solid construction of detached houses occurring especially in many high-growth metropolitan regions for owner-occupiers.
- HELMA Eigenheimbau AG also realises **individual energy self-sufficient houses without land plots**.

Total market: c. 78 % of owner-occupied houses in Germany are built using the solid construction method

Pre-planned segment

- **Pre-planned residential units in semi-detached, terraced and multi-family houses**, all including land plots, in various major cities as well as in their suburbs for owner-occupiers (focus) and investors via HELMA Wohnungsbau GmbH.
- HELMA Ferienimmobilien GmbH develops, plans and sells **holiday properties and apartments** to private customers for own use or as high-yield capital investment – Including land plot with current focus on the North Sea and Baltic Coast, German seaside and river locations, and the low mountain range.

Individual and Pre-planned segments

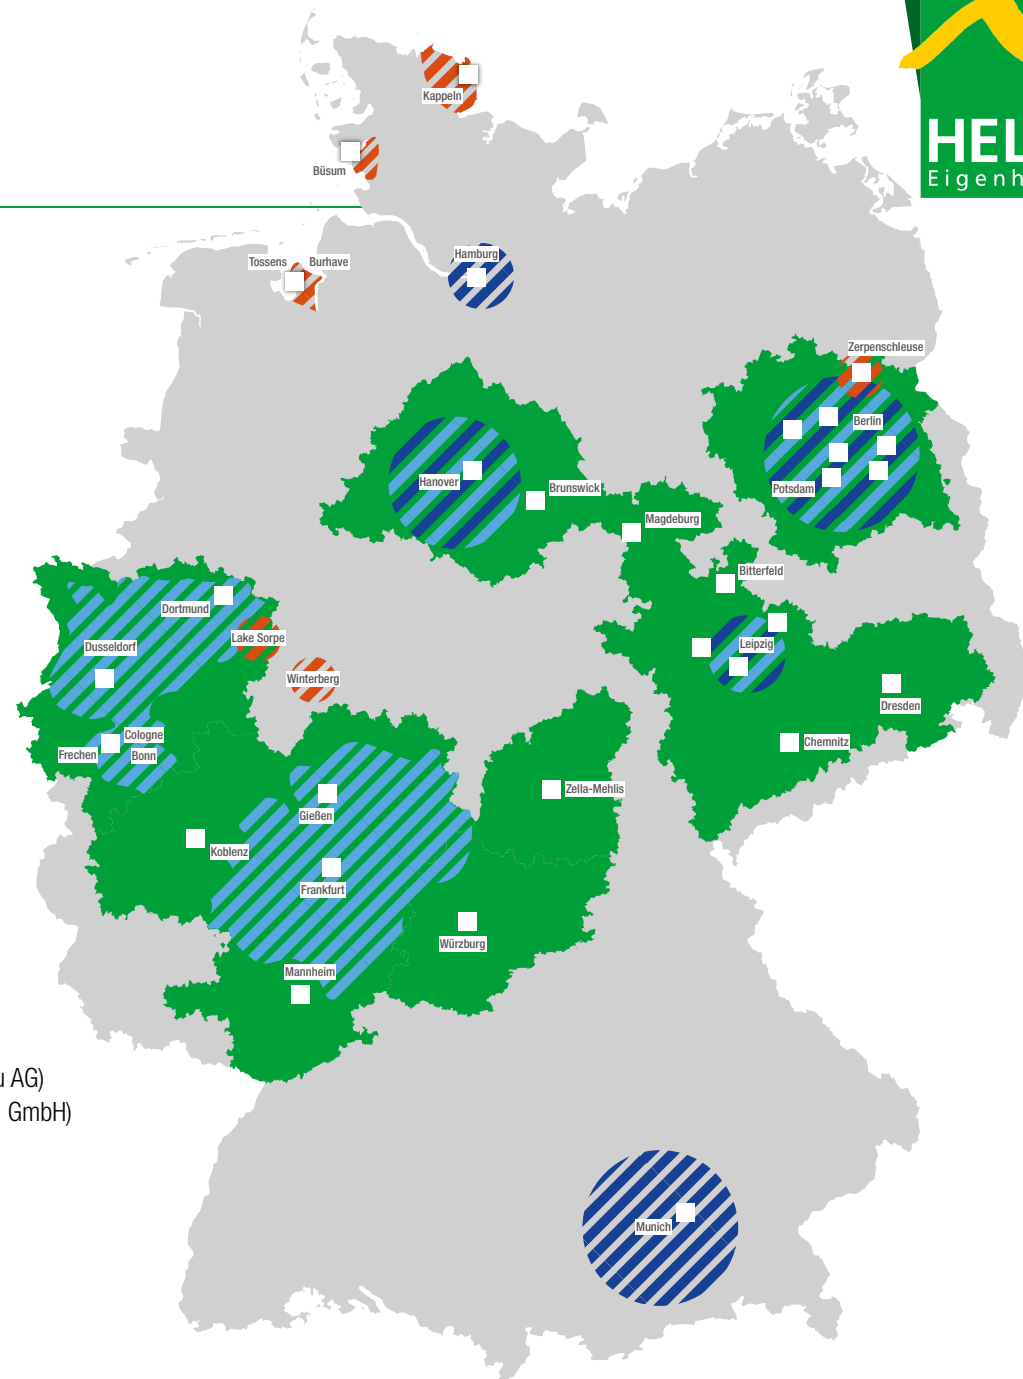

- Nationwide and bank-independent **financing and building insurance brokerage**, especially for private customers of the HELMA Group via Hausbau Finanz GmbH.

2. Business model

Competitive strengths

- **Experienced:** Several thousand references
- **Attractive:** Individual all-inclusive packages
- **Value-retaining:** Sustainable product quality
- **Personal:** Regional presence
- **Secure:** High creditworthiness and transparency

3. Real estate megatrends

Environmentally compatible construction / Attractive metropolitan regions /
Living in the countryside

Increasing customer focus on sustainable construction methods and heating technologies. New federal subsidies planned for 2023.

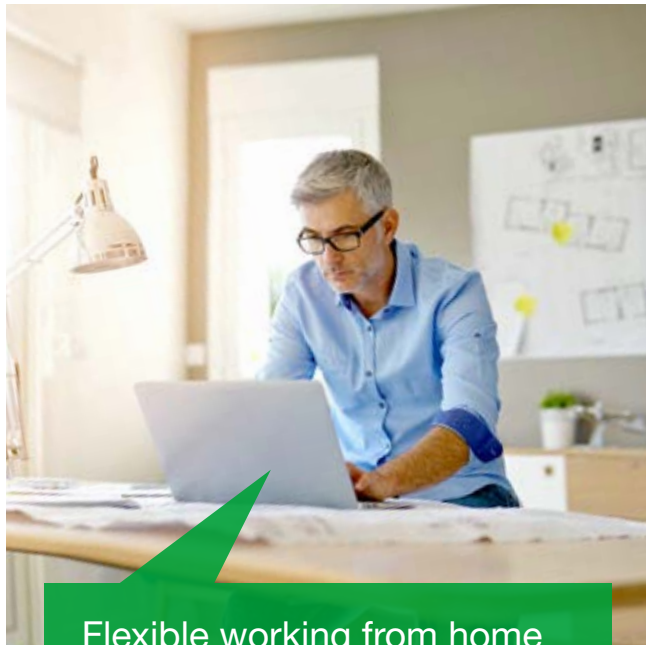

Trend towards living in high-growth metropolitan regions.

Residential properties with their own garden are particularly in demand.

3. Real estate megatrends

Home office working / Vacations in Germany

Flexible working from home awakens people's desire to change their living situation.

German holiday regions benefit from increased interest in sustainable tourism.

Mobile working in holiday properties is becoming increasingly popular.

4. Sustainability

Ecological and social responsibility

Reducing CO₂ emissions

The houses and apartments that we realise each year achieve CO₂ emission reductions of around 250,000 tons* in comparison with the average building stock.

*Calculated on the basis of a useful life of 50 years, similar to that taken as the basis for the rate of depreciation of buildings.

Social responsibility

We are committed to supporting social institutions that assist children, young people and families in difficult situations.

Sustainable resource utilisation

As a member of the German Working Group for Environmentally Conscious Management (B.A.U.M.) and the Sonnenhaus Institute, we actively participate in the development and application of sustainable and resource-conserving energy concepts.

4. Sustainability

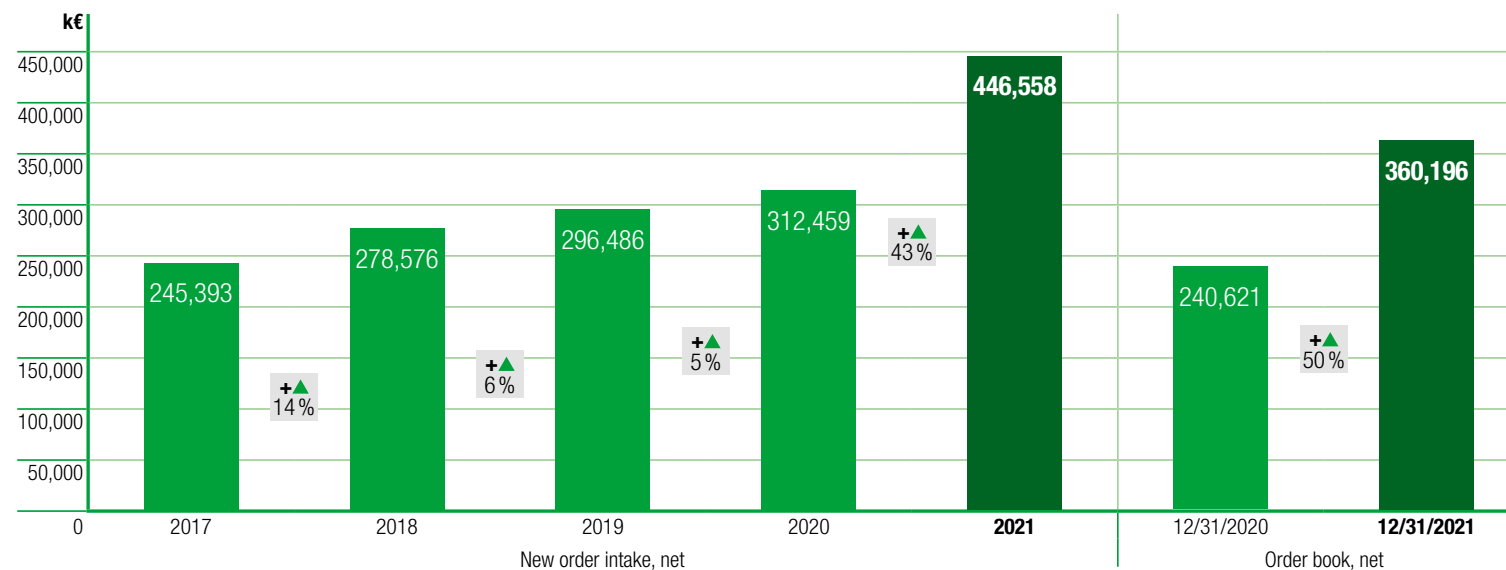

Energy-efficient construction methods and sustainable energy concepts

- HELMA is a pioneer in the development of sustainable energy concepts.
- Increasing de-technicalisation of houses is environmentally compatible, reduces investment costs and diminishes need for maintenance.
- Future energy self-sufficient houses will be equipped with photovoltaics and electricity storage and will dispense with solar thermal energy and heat pumps.
- Heating supplied by infrared heaters and hot water boilers.

5. Order book position

HELMA Group new order intake and order book position

- Discontinuation of new construction subsidies for Efficiency House 55 as of January 2022 led to tangible accelerated purchasing effects in Q4 2021.
- Even without accelerated purchasing effects, new order intake in 2021 would have been over € 400 million (+ 30 % year-on-year).
- These accelerated purchasing effects must also be taken into consideration in the strong order book position as of December 31, 2021.

5. Order book position

Pre-planned	10,392	46.3	13,381	49.0
Total	22,461	100.0	27,286	100.0

- EBT lies within the target range of the earnings guidance that was raised on November 15, 2021 (> € 27.0 million) and tangibly above the original EBT forecast (€ 25–26 million).
- EBT in the **Individual segment** grew by 15.2 % and in the **Pre-planned segment** by 28.8 %.
- Record earnings per share of € 4.69 in 2021 (2020: € 3.84).

6. Financial figures

Trends in cost ratios to revenue

- Pleasing trend in the materials expense ratio due to above-average margins on various property development projects despite difficult conditions in procurement markets.
- Improvement in the personnel expense ratio reflects above-average revenue growth compared to market-related wage adjustments on an almost unchanged headcount.
- Increase in other operating expense ratio reflects highest revenue growth rate in business area with above-average sales commissions.

6. Financial figures

Trends in profit margins to revenue

- Adjusted EBIT margin of 9.1 % reflects further tangible year-on-year improvement.
- EBT margin and return on sales approximately at previous year's level, as positive special effects included in the previous year's financial result.

6. Financial figures

Strong financial position with equity ratio above the sector average

Consolidated balance sheet structure of assets

- of which current financial liabilities	36,890	8.7	20,633	4.6
Total equity and liabilities	423,372	100.0	451,430	100.0

- Increase in inventories – including land plots recognised as current assets at cost prices (principle of lowest value) – secures continued growth of high-margin property development business.
- Equity base well above the average sector level enables financing land purchases through land acquisition financing facilities and/or working capital facilities with favourable interest rates.
- Current financial liabilities comprise, among others, financing facilities for land and projects. As it is to be assumed that these financing facilities will be repaid through the acquirer's purchase price payments within the next twelve months, these liabilities are to be presented as current financial liabilities irrespective of the actual financing term.

- Sustainably positive cash earnings from operating business.
- Forward-looking inventory accumulation reflecting more land plot purchases increases working capital.

7. Project pipeline

Successful expansion of the project pipeline

in k€	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021

- of which others	269	106	65	67	43

- Land plots held as inventory (recognised at lower of cost or market) of € 230.5 million as well as further contractually secured land plots with a purchase price volume of € 52.8 million as of December 31, 2021 (December 31, 2020: € 41.2 million) form an excellent foundation on which to expand the high-margin property development business.
- Most of the purchase price for land plots is usually paid after the building rights have been established, which significantly reduces risk as well as capital intensity.
- The purchase of the property volume recognised as of December 31, 2021 was realised approximately four years ago on average.

7. Project pipeline

Value creation and value appreciation

Land plots held as inventory and contractually secured land plots totaling € 283.3 million as of December 31, 2021

Revenue potential of € 2.0 billion from realised land purchases as of December 31, 2021

- Favourable initial purchase prices due to experienced acquisition agents
- Development gains through the creation of building rights and optimal land utilisation
- Significant price increases in the core regions
- Sale of HELMA products through strong specialist advisors with a high level of company identification

7. Project pipeline

Case studies: Attractive land purchases in the Hanover and Berlin regions

- Agricultural land with a total area of approximately 105,000 m² successively acquired from various sellers in 2020 and 2021.
- HELMA is responsible for procurement of building rights and development over the coming years.
- Development of approximately 117 residential units in detached and terraced houses.
- Access to existing, broad network of contacts enables exclusive acquisition of undeveloped land with building rights with a total size of approximately 55,000 m² in 2020.
- Preparation and development of the land carried out by the seller.
- Development of approximately 105 residential units in detached, semi-detached and terraced houses.

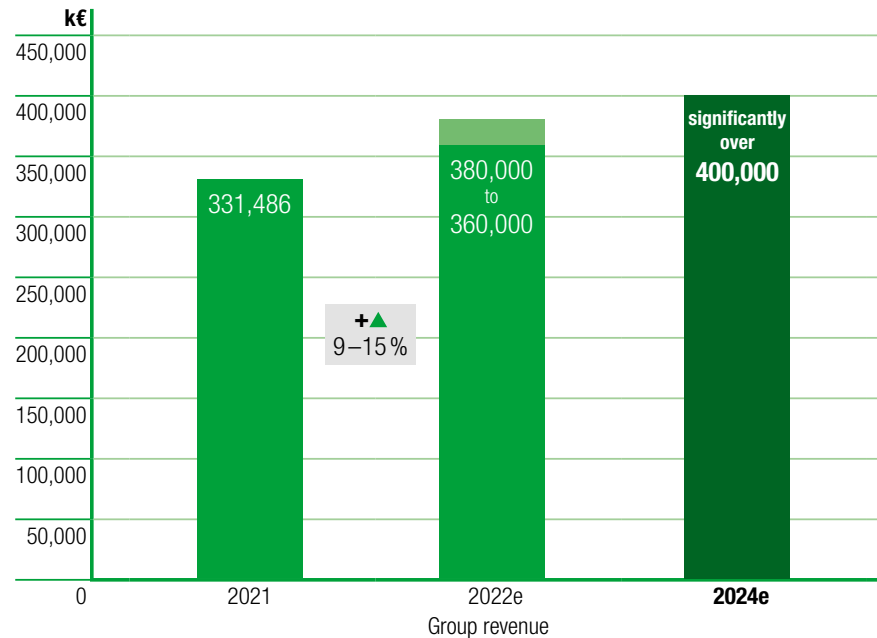

7. Project pipeline

- **Property development subsidiaries** exhibit **€ 2.0 billion of revenue potential**; most of this can be realised within a period of around 6 years.
- **HELMA Eigenheimbau AG** is expected to generate **annual revenue of at least € 125 million** for which it does not need its own land.

8. Forecast

- Assuming an intact market environment, Group revenue of well above € 400 million and an increase in EBT margin to a level of over 10 % (2021: 8.2 %) are expected by 2024 at the latest.
- **Group EBT of well over € 40 million** would thereby be achieved for the first time by 2024 at the latest.
- On the corporate side, the preconditions also exist to continue to realise further dynamic growth in income over the coming years.

8. Forecast

Financing strategy

- **Equity base well above the average sector level**
as basis for further corporate growth

- **Operating cash flow from current projects**
and retained profits

- **Land purchase finance arrangements**
with various, mainly long-standing, partner banks

- **Use of unsecured credit lines for temporary current financing**
made available by a broad spectrum of banks

- **Capital market transactions or promissory note issues**
comprise additional options where required

The average interest rate of the financial liabilities of the HELMA Group as of the balance sheet date (12/31/2021) was around 2.09 % p. a. and is thus clearly below the average financing costs of the relevant competition.
