

Impreglon on target with new record numbers

Half year results 2014 confirm full year projection

The good numbers of the second quarter indicate that the ambitious management projections of EUR 140MM in sales and EUR 20MM plus in earnings before depreciation and interest (EBITDA) for the full year are realistic. Sales as well as all earning numbers have reached new record levels. Remarkable is the number for earnings per share which has more than doubled in comparison to last year despite of the increased number of shares. It now becomes evident that the large number of acquisitions in the past years begins to bear fruit.

With 35 plants in 15 countries on 4 continents Impreglon is a worldwide leader in surface technology.
