

INVESTOR PRESENTATION

Q3 2019

Safe harbor

Alternative performance measures and management estimates

This financial report contains a number of alternative performance measures (non-GAAP figures) to provide readers with additional financial information that is regularly reviewed by management, such as EBITDA and Free Cash Flow ('FCF'). These non-GAAP figures should not be viewed as a substitute for KPN's GAAP figures and are not uniformly defined by all companies including KPN's peers. Numerical reconciliations are included in KPN's quarterly factsheets and in the Integrated Annual Report 2018. KPN's management considers these non-GAAP figures, combined with GAAP performance measures and in conjunction with each other, most appropriate to measure the performance of the Group and its segments. The non-GAAP figures are used by management for planning, reporting (internal and external) and incentive purposes. KPN's main alternative performance measures are listed below. The figures shown in this financial report are based on continuing operations and were rounded in accordance with standard business principles. As a result, totals indicated may not be equal to the precise sum of the individual figures.

Financial information is based on KPN's interpretation of IFRS as adopted by the European Union as disclosed in the Integrated Annual Report 2018 and do not take into account the impact of future IFRS standards or interpretations. Note that certain definitions used by KPN in this report deviate from the literal definition thereof and should not be considered in isolation or as a substitute for analyses of the results as reported under IFRS as adopted by the European Union. KPN defines revenues as the total of revenues and other income. Adjusted revenues are derived from revenues (including other income) and are adjusted for the impact of incidentals. KPN defines EBITDA as operating result before depreciation (including impairments) of PP&E and amortization (including impairments) of intangible assets. Adjusted EBITDA after leases ('adjusted EBITDA AL') are derived from EBITDA and are adjusted for the impact of restructuring costs and incidentals ('adjusted') and for lease costs, including depreciation of right-of-use assets and interest on lease liabilities ('after leases' or 'AL'). KPN defines Gross Debt as the nominal value of interest-bearing financial liabilities representing the net repayment obligations in Euro, excluding derivatives, related collateral, and leases, taking into account 50% of the nominal value of the hybrid capital instruments. In its Leverage Ratio, KPN defines Net Debt as Gross Debt less net cash and short-term investments, divided by 12 month rolling adjusted EBITDA AL excluding major changes in the composition of the Group (acquisitions and disposals). The Lease adjusted leverage ratio is calculated as Net Debt including lease liabilities divided by 12 month rolling adjusted EBITDA excluding major changes in the composition of the Group (acquisitions and disposals). Free Cash Flow ('FCF') is defined as cash flow from continuing operating activities plus proceeds from real estate, minus capital expenditures (Capex), being expenditures on PP&E and software and adjusted for repayments of lease liabilities.

All market share information in this financial report is based on management estimates based on externally available information, unless indicated otherwise. For a full overview on KPN's non-financial information, reference is made to KPN's quarterly factsheets available on ir.kpn.com.

Forward-looking statements

Certain statements contained in this financial report constitute forward-looking statements. These statements may include, without limitation, statements concerning future results of operations, the impact of regulatory initiatives on KPN's operations, KPN's and its joint ventures' share of new and existing markets, general industry and macro-economic trends and KPN's performance relative thereto and statements preceded by, followed by or including the words "believes", "expects", "anticipates", "will", "may", "could", "should", "intends", "estimate", "plan", "goal", "target", "aim" or similar expressions. These forward-looking statements rely on a number of assumptions concerning future events and are subject to uncertainties and other factors, many of which are outside KPN's control that could cause actual results to differ materially from such statements. A number of these factors are described (not exhaustively) in the Integrated Annual Report 2018. All forward-looking statements and ambitions stated in this financial report that refer to a growth or decline, refer to such growth or decline relative to the situation per 31 December 2018, unless stated otherwise.

Comparative figures regarding IFRS 16 and amendment IAS 12

Please note that non-material adjustments have been made to the 2018 financial figures, based on the latest insights from the IFRS 16 adoption and on the amendment to IAS 12. The impact of the adoption of IFRS 16 is unaudited and may be subject to change until the publication of KPN's Financial Statements 2019.

STRATEGY 2019-2021

Outlook 2019 and 2019 – 2021 ambitions

organic sustainable growth

	Outlook 2019	2019 – 2021 ambitions
Adjusted EBITDA AL	Slightly growing compared with 2018 ¹	Organic growth
Capex	€ 1.1bn	Stable at € 1.1bn annually
FCF (excl. TEFD dividend)	Incidentally lower FCF compared with 2018 due to front-end loaded restructuring charges and adverse phasing of working capital ²	Three-year mid-single digit CAGR ³ driven by EBITDA AL growth
Regular DPS	€ 12.5 cents	Progressive dividend, supported by FCF

1 Previous Adjusted EBITDA AL outlook: "In line with 2018"

2 FCF outlook: Impact materially higher restructuring cash out in 2019 is partially mitigated by natural employee attrition, but this is in turn offset by change in working capital

3 Three-year CAGR calculated from the end of 2018 to the end of 2021

Debt portfolio

Nominal debt¹
by type

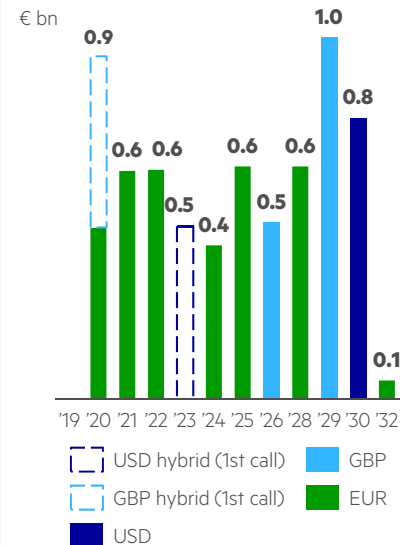

Nominal debt
by currency

Fixed vs. floating
interest³

Bond redemption
profile

¹ Based on the nominal value of interest-bearing liabilities after swap to EUR, including GBP 400m hybrid bond and USD 600m hybrid bond

² Foreign currency amounts hedged into EUR

³ Excludes bank overdrafts

Treatment of hybrid bonds

KPN & credit rating agencies

Each tranche of the hybrid bonds is recognized as 50% equity and 50% debt by the rating agencies

Definition of KPN net debt includes: '[...], taking into account 50% of the nominal value of any hybrid capital instrument'

- Hybrid bonds are part of KPN's bond portfolio
- Independent of IFRS classification
- In line with treatment by credit rating agencies

IFRS

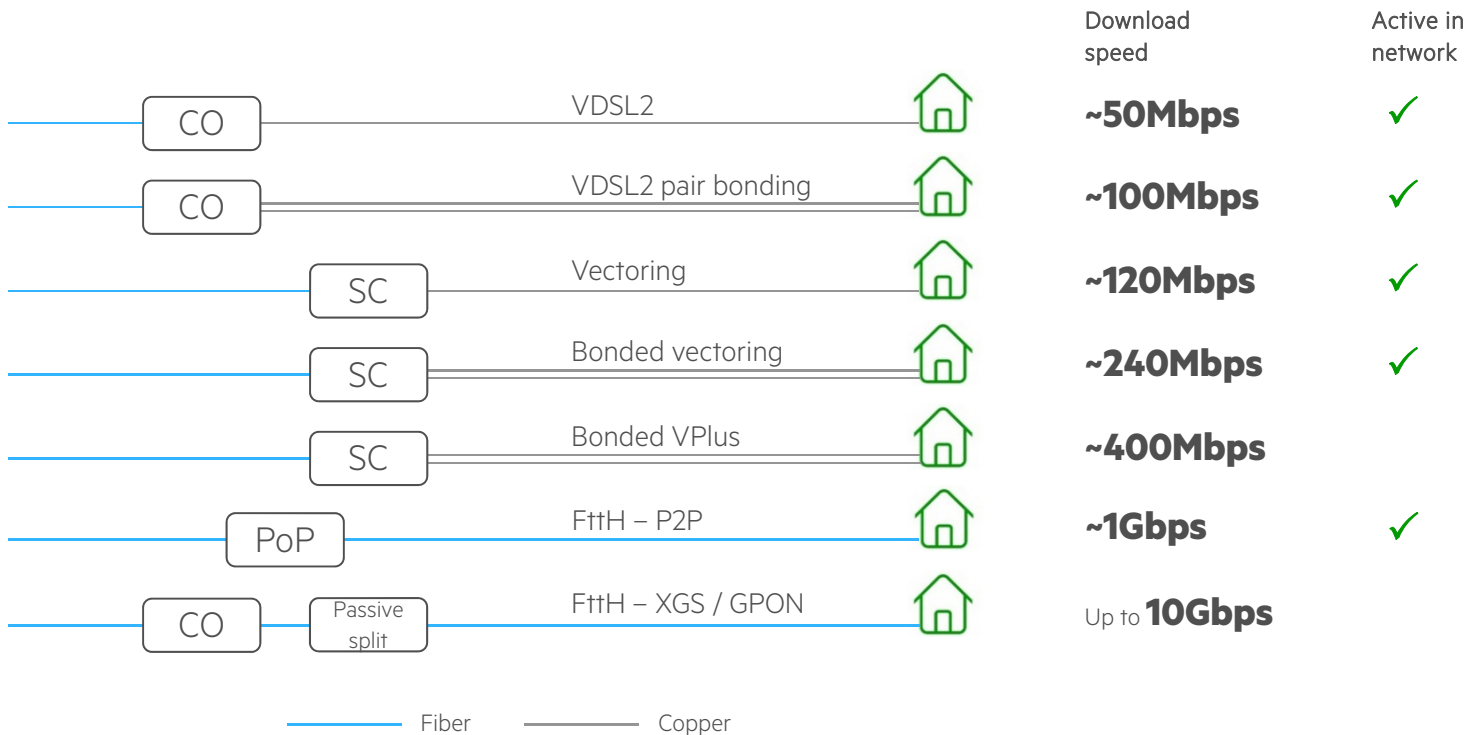

GBP and USD tranche have 60 years specified maturity, accounted for as financial liability

- Coupon payments treated as regular bond coupon, hence expensed through P&L, included in FCF

Tranche	Nominal	KPN net debt	Maturity	Rates (swapped) ¹	IFRS principal	IFRS coupon
GBP 0.4bn 6.875%	€ 460m	€ 230m	60 years (1st-call Mar-2020)	6.777%	Liability	Interest paid (incl. in FCF)
USD 0.6bn 7.000%	€ 465m	€ 233m	60 years (1st-call Mar-2023)	6.344%	Liability	Interest paid (incl. in FCF)
Total	€ 925m	€ 463m				

¹ USD tranche has semi-annual coupon payments (March / September); GBP tranche has annual coupon payments in March
