A LEADER IN PITCHED ROOF SOLUTIONS

We are a leading manufacturer and supplier of pitched roof products, including both roof tiles and roofing components, in Europe, parts of Asia and South Africa. The product portfolio is completed by ceramic and steel chimneys and energy systems.

- Decades of experience in pitched roof products
- Expertise covering all steps of the manufacturing process
- One of the few tile manufacturers to also produce and sell complementary roofing components
- Wide range of product & systems offering
- Skilled people with the dedication to deliver high quality products, systems and services

THE WHOLE ROOF IS KEY

A modern roof needs to do more than just keep the water out and a full roof system is more than the sum of its parts. The advantages of tiles, individual components and both integrated heating and ventilation systems add up to a more extensive benefit.

Monier Roofing Components

Pitched roof tiles have a long tradition in Europe. Clay tiles have been used for millennia, concrete tiles for several hundred years. The basic functionality of tiles has not changed much since then: protecting the building from the elements in an aesthetic way.

OUR PRODUCTS AND SOLUTIONS MAKE THE DIFFERENCE

We offer a vast range of products that help our customers add functionality to the roof and the entire building.

CONCRETE TILES – A MODERN BUILDING MATERIAL

Concrete tiles represent a roof solution which is highly functional, ecologically sound and also excellent value for money.

Today concrete is an indispensable building material for the construction of modern buildings and a firm part of the appearance of our cities. On the roof as well, where concrete tiles provide protection against wind and weather.

- Made from sand, water, cement and pigments
- Energy-efficient production process
- Superior longevity strength increases over the years
- Long product life cycle ecologically sound roof solution
- Excellent value for money
- Variety of designs, perfectly fitting the different architectural styles
- Innovative surfaces for a smooth texture and stay-clean effects

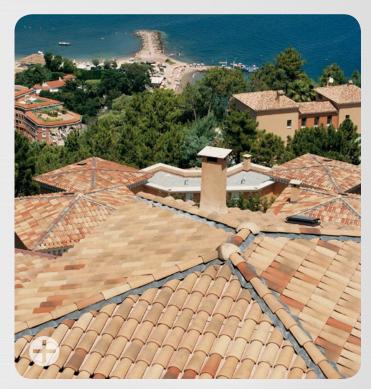

Concrete tile production process

CLAY TILES – A TRADITIONAL BUILDING MATERIAL

Clay is one of the world's oldest raw materials and clay tiles remain a contemporary building material to this day.

- Clay usually sourced from local/regional areas
- High-tech production processes
- Modern profiles support architectural trends and new building styles
- Classic profile designs made for renovation projects and traditional architecture
- Natural surface textures for a touch of warmth and a handmade look

Clay tile production process

ROOFING COMPONENTS – PERFECTLY MATCHING OUR TILES

We do not only sell a large variety of roofing components – we also manufacture them. With 6 plants in Germany, Denmark, Estonia and Malaysia, we are a global player in this business.

With the appropriate roofing accessories, our roofs transform into complete roof systems, adding functionality, quality, security and an attractive appearance to the roof.

CHIMNEYS, STOVES, ENERGY & VENTILATION SYSTEMS

Energy-efficient heating harbours the highest energy savings potential for private households and contributes significantly towards the protection of natural resources and the environment.

The chimney – part of the heating system – is as decisive for the construction of modern building shells as are ventilation solutions. With optimum solutions and highest quality standards, our subsidiary Schiedel – market leader

of chimney systems in Europe – provides ideal products for a comfortable indoor climate that ensures well-being and minimises resource consumption and costs.

SERVICE OFFER MEETS CUSTOMER NEEDS

Our comprehensive range of products is completed by a variety of services aimed at creating long-lasting value for our business partners.

We foster an open dialogue with all our customer groups: In customer advisory boards, through trainings and lectures to qualify installers, on trade fairs to

present innovations, through consultancy when the customer needs advice, or simply by giving sales support at the Point of Sale to better serve our customers' needs.

As a premium supplier, Braas Monier has always striven to be at the forefront of developments and to shape future markets. Our unrivaled Research & Development facilities provide us with deep material and product know-how, enabling us to constantly innovate in products and roofing systems.

INNOVATIVE PRODUCTS AND SOLUTIONS

At Braas Monier, we continuously develop pioneering innovations, driven by demand — and of course a sense of curiosity.

We monitor trends and changes not just within our industry to further develop our existing products and their functional performance as well as new products, materials and systems.

Over 900 patents – applied or granted – give proof of our innovative capacity in translating customer needs into a value adding offering.

WRAPTEC: SELF-WELDING MATERIAL FOR 100% WATERTIGHT SEALING

WrapTec is our new, innovative jacketing material for typically insulated heating, ventilation and air conditioning (HVAC) systems, based on our abutment technology, a lead-free, flexible and adhesive flashing.

Owing to WrapTec's unique self-welding properties, processors are now able to create 100% watertight installations very fast, thus saving time and notably cutting down on labour costs.

- Up to 50% time and cost savings at installation
- Watertight, self-welding jacketing material
- UV resistant and weatherproof
- 100% recyclable
- Simplified storage and transport (rolls)
- Carbon footprint more environmentally friendly than that of aluminium claddings

Product flyer Website

AERLOX: LIGHT • STRONG • FAST — THE NEXT GENERATION OF CONCRETE TILES

Concrete tiles with Aerlox technology are a new type of light weight tile with a highly advanced recipe and physical structure that allow it to weigh 40% less per m² than a standard concrete tile whilst retaining all important advantages.

Concrete tiles with Aerlox technology

- are suitable for weaker roof structures
- are easy to carry and install for roofers thus saving time and physical effort
- increase economically feasible transportation radius
- deliver better summer comfort and soundproofing than other light weight materials
- give the home owner an attractive looking roof
- are as robust, frost resistant and long-lasting as a standard concrete tile
- but still weigh up to 40% less than standard concrete tiles

TECHNICAL AND INDUSTRIAL KNOW-HOW – EXPERS AT WORK

We devote a multitude of resources to research, product development, product and systems testing and process engineering.

A dedicated in-house team of product designers, material scientists, and engineers work closely with equipment manufacturers and external specialists to develop new and improved products and to constantly improve our plants' performance. This is done in close co-operation with the local industrial communities and the Factory Excellence team in our headquarter.

Factory Excellence Programme

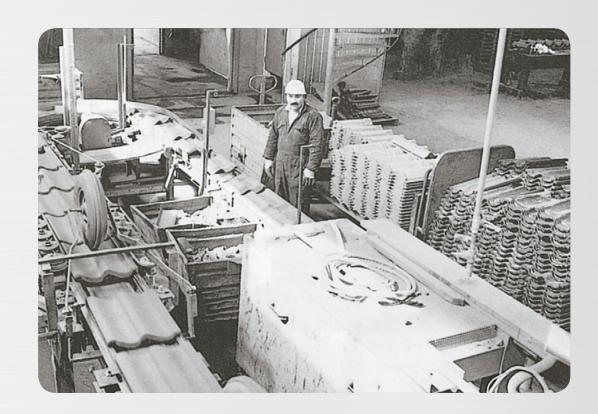

Employee testimonial

A TRADITION IN ROOF TILES, COMPONENTS AND CHIMNEYS

We have been making pitched roof products for almost a century, forging strong long-term relationships with our customers. And we have been the leading chimney specialist in Europe since decades.

- Decades of experience in our markets
- Well established, trusted and successful brands
- A wide range of roofing products for literally all roofing projects and local requirements
- A broad offering of chimneys and energy systems grown over decades
- Manufacturing expertise covers all steps of the manufacturing process and can be found around the globe
- Longstanding relationship with our business partners

Global Footprint

With more than 100 plants in almost 30 countries, Braas Monier has a well established plant network allowing it to successfully serve individual customer needs in mature European markets as well as in emerging markets in Asia and Africa.

WORLD-WIDE PRESENCE

With more than 100 production sites and business operations in 37 countries Braas Monier is always close to its customers world-wide.

EXPERTS IN LOCAL BUILDING TRADITIONS

Regional preferences play a major role in roof tile aesthetics. Expertise in local building traditions requires direct proximity: Our customers benefit from the fact that we are represented all over the world – we are where you are.
