# Notes to the financial statements for the financial year 2013

#### I. General information

The financial statements of Sky Deutschland AG, Unterföhring (hereinafter referred to as "Sky Deutschland AG"), as of 31 December 2013 have been prepared in accordance with Section 264 (1) HGB [German Commercial Code] in conjunction with Section 267 (3) HGB on the basis of the regulations in the HGB on the accounting of large corporations, and the German Stock Companies Act.

The recognition and measurement methods applied are consistent with those applied in the previous year.

The Company was admitted for trading on the regulated market in the Prime Standard segment of the Frankfurt Stock Exchange with the commencement of trading in the Company's shares on 9 March 2005.

The presentation of the statement of operations follows the type of expenditure format in accordance with Section 275 (2) HGB.

The Company as the managing holding company is responsible for the strategic management of the Group and carries out planning, consultative and management functions.

#### II. Accounting policies

**Intangible assets** are measured at cost and are amortized straight-line over their expected useful lives. The assets are amortized pro rata temporis in the year of acquisition.

Goodwill is amortized over an estimated useful life of 15 years taking into consideration the impact of current and forecast business and general economic conditions on the value drivers that form the basis for the goodwill valuation.

Items of **property, plant and equipment** are recognized at cost plus incidental purchase costs, after allowances and discounts, less accumulated depreciation.

The straight-line method is generally used for the depreciation of moveable fixed assets over their expected useful lives and is applied pro rata temporis in the acquisition or disposal year.

Minor value assets costing individually up to and including €150.00 are recorded directly as expense in the year they were acquired. Assets costing individually between €150.00 and €1,000.00 have been accumulated since 1 January 2008 in a compound item and depreciated straight-line over five years. Deviations from the economic useful life are considered to be immaterial.

Interests in affiliated companies and loans to affiliated companies are recognized under **financial assets** at cost, taking into account necessary valuation allowances.

Receivables and other assets are measured at nominal value, whereby foreseeable specific risks are reflected by individual allowances.

Cash and cash equivalents are measured at nominal value.

**Prepaid expenses** are set up only as prescribed by Section 250 HGB. The option of activating the disagio of the convertible bond has been selected in accordance with Section 250 (3) Sent. 1 HGB. The disagio will be depreciated over the term of the convertible bond according to Section 250 (3) Sent. 2.

The **provisions for pension obligations** are calculated applying the projected unit credit method and were determined in accordance with actuarial principles, taking into account the Heubeck "2005 G Mortality Tables" and a discount rate of 4.88 percent per annum. The interest rate announced for 31 December 2013 represents the discount rate for a remaining term of 15 years as determined by the German Federal Bank according to the Regulation on the Discounting of Provisions. Wage and salary trends (for 2014: 3.5 percent per annum, from 2015: 2.5 percent per annum) and pension trends (2.0 percent per annum), include an inflation adjustment of 2.0 percent per annum, are taken into consideration in the determination of the provisions.

Other provisions are recognized at their settlement amounts taking into account future price and cost increases that are considered necessary based on reasonable commercial judgment. All foreseeable risks and uncertain obligations are considered. Provisions with a remaining term of over one year are discounted. For the purpose of discounting, the average market interest rate over the past seven years as published by the German Federal Bank is used.

**Derivative financial instruments as** of the reporting date comprise interest rate hedging transactions. Negative fair values are recognized as a provision for anticipated losses in the other provisions. Sky Deutschland AG has not formed valuation units in accordance with Section 254 HGB.

Liabilities are recognized at their settlement amounts.

The translation of assets and liabilities denominated in foreign currencies is carried out continually as of the respective booking date and as of the reporting date in accordance with Section 256a HGB at the middle rate of exchange. In case of a remaining term exceeding one year, Sky Deutschland AG applies the acquisition cost and imparity principle, i.e., exchange rate losses are recognized through profit and loss and exchange rate gains are not recognized. In the event of a remaining term of one year or less, both exchange rate losses and exchange rate gains are recognized through profit and loss.

**Deferred tax assets and liabilities** are recorded in accordance with Section 274 (1) HGB for differences between the tax bases and the carrying amounts of assets, liabilities and accrued and deferred items in the annual financial statements. Differences are only considered when they are expected to reverse with fiscal effect in future financial periods, deferred taxes are recorded only for temporary and quasi-permanent differences. The financial statements show the net position of deferred tax assets and liabilities. Deferred taxes are calculated in accordance with Section 274 (2) HGB using the entity-specific tax rate of 27.38 percent for Sky Deutschland AG. As an exception to this principle, the difference between the carrying amount of the investment in Sky Deutschland Fernsehen GmbH & Co. KG, Unterföhring (hereinafter referred to as "Sky Deutschland KG") in the annual financial statements and the related tax base is calculated using only the corporate income tax rate plus the solidarity surcharge (15.83 percent).

In addition, Sky Deutschland AG acts as the parent company concerning a consolidated tax filing status for corporate income tax and trade tax purposes. The consolidated tax filing includes Sky Deutschland AG and SCAS Satellite CA Services GmbH, Unterföhring (hereinafter referred to as "SCAS") as the controlled company. The deferred taxes are calculated at the level of the controlled company whereas they are recorded in the financial statements of the parent company.

The Management Board

## Auditor's Report

We have audited the annual financial statements, comprising the balance sheet, the income statement and the notes to the financial statements, together with the bookkeeping system of Sky Deutschland AG, Unterföhring, and the management report of the Company and the Group for the financial year from 1 January to 31 December 2013. The maintenance of the books and records and the preparation of the annual financial statements and management report in accordance with German commercial law are the responsibility of the Company's management board. Our responsibility is to express an opinion on the annual financial statements, together with the bookkeeping system, and the management report based on our audit.

We conducted our audit of the annual financial statements in accordance with Section 317 of the German Commercial Code [HGB] and the generally accepted standards for the audit of financial statements promulgated by the German Institute of Public Auditors [IDW]. Those standards require that we plan and perform the audit such that misstatements materially affecting the presentation of the net assets, financial position and results of operations in the annual financial statements in accordance with German principles of proper accounting and in the management report are detected with reasonable assurance. Knowledge of the business activities and the economic and legal environment of the Company and expectations as to possible misstatements are taken into account in the determination of audit procedures. The effectiveness of the accounting-related internal control system and the evidence supporting the disclosures in the books and records, the annual financial statements and the management report are examined primarily on a test basis within the framework of the audit. The audit includes assessing the accounting principles used and significant estimates made by the management board, as well as evaluating the overall presentation of the annual financial statements and management report. We believe that our audit provides a reasonable basis for our opinion.

Our audit has not led to any reservations.

In our opinion, based on the findings of our audit, the annual financial statements comply with the legal requirements and give a true and fair view of the net assets, financial position and results of operations of the Company in accordance with German principles of proper accounting. The management report is consistent with the annual financial statements and as a whole provides a suitable view of the Company's position and suitably presents the opportunities and risks of future development.
